Conveyor Toaster

Let them eat toast!—and other perfectly golden-brown morning favorites with this amazingly easy to use front-of-the-house special.

Manufactured
In The USA 

Thorough 'bread' Moneymaker

Set it up and let it run. Nothing delivers better toasting perfection, with less maintenance hassle, than the Nemco Conveyor Toaster.

a 'Toast' to Efficiency

Simple design features ensure outstanding performance with no over-engineering and no wasted energy.

- Nemco's proprietary element pattern provides consistent toasting, left to right, across the entire conveyor.
- The convenient 4-position rotary switch lets you choose from toasting on one side, toasting on both sides, standby mode or off.
- Standby mode runs the topside element at a low temperature, saving energy when not in use, but generating faster, more efficient recovery when tripped back into action.

Ageless Wonder

Still more simple design features also ensure your toaster keeps humming along and looking front-of-the-house presentable for years.

- Bronze conveyor bearings keep shafts aligned and freely moving, so the conveyor doesn't bind, stalling out the motor.
- Stainless-steel construction, with a black textured powder-coat top, maintains a toughness worthy of any commercial-kitchen and an appearance worthy of any catering or breakfast buffet line.
- Special features like a removable crumb tray make cleaning easy.

Suggested Uses

Works in tough back-of-the-house applications, but has the finesse to hold its appeal in self-serve lines too. Great for toasting bread, bagels, English muffins, pre-made waffles and other items commonly dropped in a toaster at home.

General Specifications

Model	Description	Size (w x d x h)	Capacity (per hour)	Weight
6800	2-slice	14" x 18" x 15"	300 pcs.	33 lbs.
6805	3-slice	19" x 18" x 15"	1000 pcs.	35 lbs.

Electrical Requirements

Model	Volts	Watts	Amps
6800	120	1,660	13.8
6805	220	3,600	16.3

Replacement parts are available through Nemco's 24-hour Zip Program.

Nemco reserves the right to make design, specification or model changes without notice.

Black powder coat top.

Stainless steel body with louvers stays cool to the touch.

Nickel-plated wire front-load chute makes it easy to feed product into the toaster.

Removable crumb tray for easy cleanup.

4-position rotary switch changes from toasting on both sides, to one side, to standby mode, to off.

2 1/2" adjustable legs.
